PROFILE

I am a aspiring full stack software engineer with a solid background and a strong desire to create dynamic web solutions. I bring technical expertise and creative problem-solving to the forefront of my work, as I am proficient in HTML, CSS, JavaScript, React JS, Next JS, PHP, Laravel and MySQL. I am excited to contribute innovative and user-centric solutions in the dynamic field of web development, as I am committed to staying current with industry trends and eager to learn.

WORK EXPERIENCE

On-the Job Training

MMC IT Services   Jan-May 2024

- Designed and developed a custom CRM system for training purposes, which included both frontend UI/UX and backend database design.
- Implemented user authentication and role-based access control (RBAC) to ensure secure access to various areas of the system while also facilitating segregation of duties and data protection.
- Added social authentication functionality via Google and Facebook APIs, allowing users to easily log in with their social media accounts.
- Completed extensive testing and quality assurance procedures to identify and resolve any issues, ensuring the CRM system's reliability and efficiency.

On-the Job Training

E - Library Dagupan   2018-2019

- Helped staff with tasks such as visitor assistance.
- Aided in formatting computers and installing the latest operating system.
- Assisted in editing photos using Photoshop.
- Encoded student's data for ID cards, printing, and lamination.
- Received some technical training such as cloning operating system.
